GREAVES'S PORTLAND, ROMAN, and LIAS CEMENTS.—The above possess every recommendation desirable, in an eminent degree, and are unequalled for all hydraulic purposes.

GREAVES'S GROUND BLUE LIAS LIME.

FREEMAN and RICHARDSON, Agents.

Office, Warwick. 3 South wharf, Paddington.

MARTIN'S PATENT
FIRE-PROOF AND ORNAMENTAL CEMENT,
APPLICABLE FOR
ALL INTERNAL PURPOSES WHERE PLASTERING IS REQUIRED.

The invaluable Cement has now been before the public so many years, and obtained so high a standing in the estimation of all who have used it, that it is unnecessary to comment on its merits. Messrs. STEVENS and SON, however, feel called upon to observe that from the greater extent of surface which a given quantity of MARTIN'S will cover, as compared with other Cements for internal use, there will be found a gain of 10l per cent. in material full 7 per cent. less in price, with an additional saving in labour of 10 per cent., by its allowing about forty minutes for working, being less than one-fourth of the time of other cements of a similar nature, therefore worked with greater facility, making together the economical saving of full THIRTY-THREE PER CENT.; its advantages therefore cannot admit of doubt. Experiments, observing its beauty, hardness, and applicability to all plain and ornamental purposes, may be seen; and the Cement, in any quantity, obtained of Messrs. STEVENS and SON, at their Plaster and Cement Works, 18, Ivery-lane, London.—Manufactory, Derwent Mill, Derby.

N.B. This Cement will receive paint or paper to a few hours after the completion of the work by the plasterers.

ROMAN and other CEMENTS.—Manufactured by J. B. BLANDFIELD, successor to the patentees, PARKER and WYATT, who in 1796, first introduced PARKER'S ROMAN CEMENT, which has now for upwards of fifty years been extensively used in most of the public and private buildings and other works in this country and throughout the world. Among the more recent works in this country where it has been largely employed since the present proprietor became the manufacturer, may be named the Lyceum and St. James's Theatres, the Carlton, Reform, and Army and Navy Club Houses, the London Docks, the Thames Tunnel, the Winter Palace, St. Petersburgh, the British Museum, the York Minster, the Royal Exchange, the Nelson Column, and the New Houses of Parliament. When properly applied, it is the most perfect and economical Cement for hydraulic works known; and, when used as stucco, it will resist the action of fog and frost, and preserve walls from damp. As a mortar for brickwork it surpasses any other material and is NEARLY AS CHEAP FOR SUCH WORK AS MORTAR MADE OF ORDINARY LIME. Terras, an Hydraulic Lime, for setting masonry where slow indurations is important, so as to allow for the settlement of work. A Cement of extraordinary tenacity and hydraulic properties, and with which the most ancient works in Lancashire have been executed. Hamelin's Patent Mastic, or Oil Cement, which may be painted immediately after use. Also Martin's Cement. Keene's Cement. Best Stucco. Genuine Plaster of Paris, procured from the purest gypsum, and of any degree of fineness required. Chimney pots, Trusses, Pan Tiles, &c.—Manufactory, Mill-mill, Poplar. Depôts, Commercial-road East, Stamford-street, and Paddington basin. Coombs-house, 5, New London-street, Mark-lane, City.

They are proof against atmospheric action, gases, and salt water, of which the following testimonials are sufficient evidence.

"S. Bilbier steamer,
"Gentlemen, St. April, 1851.

"The result of the trial of your Mineral Oxide Paints on the ships manufactured by us for the service of the Honourable Commission of the Trinity House, has been very satisfactory, both as it regards the quality and the durability of the Paints, and the economy of cost.

"You are at liberty to make use of this testimonial in their favour.

"We are, Gentlemen, your obedient Servants,
(Signed) "BROWN, LENNOX, and CO."
"c. Wharf Canal-road, Kingsland-road,
London, April 9, 1851.

"Sir,
"We have used your paint on the various gas works which we have constructed during the last seven years, and have no hesitation in stating it to be the best and most durable covering for iron.

"We shall continue to use and recommend it as heretofore.
"We are, Sir, yours obediently,
(Signed) "WESTWOOD and WRIGHTS."

Other testimonials can be had on application.

HUBBUCK'S PATENT WHITE ZINC PAINT.—AN ANNOUNCEMENT.

FOR MARINE USE it possesses the following advantages:—It is whiter than any other Paint, and retains its white colour for years unaffected by bilge-water or noxious vapours from cargo. The White Paint in the hold of a ship, after discharging a cargo of sugar, is found to be as white as the very before, when newly painted. Under these and other circumstances, no lead-coloured paint hitherto known and tried has failed, the "White Zinc Paint" has preserved the freshness of its colour. Moreover, by virtue of its galvanic action on iron, it enters the pores, and forms an amalgam of the two metals, which protects the iron from rust, decay, or incrustation.

FOR THE GENERAL PURPOSES of the decorative painter, the "White Zinc Paint" has been found unparalleled in whiteness, fineness of colour, durability, and beauty of texture. It becomes as hard as to admit of polishing equal to the finest ivory.

FOR SANITARY PURPOSES the "White Zinc Paint" is valuable, not only from its being totally free from every mercurial injurious to health, but from its combining chemical qualities which render it a powerful destroyer of the miasma which may have prevailed; furniture or buildings painted with it are entirely purified. "Varnish and Painters' Caulic are avoided by its use, as well as similar results to the ravages of newly painted rooms. A person's room is immediately occupied, without injury to the health of children or the most delicate constitution. It covers larger than common paint, from its spreading over a much larger surface. Best of this paint covers as much as is usually covered by 1 cwt. of white lead. Each cask is stamped with the name "Hubbuck—London."—Price 42s. per cwt., in the style of the Manufacturers. Agents with full particulars may be had of the manufacturers, THOMAS HUBBUCK and SON, Colour Works, opposite the London Docks.

THE METALLIC PAINT, produced by the PATENT ALKALI COMPANY, has been extensively used for several years on farm buildings, iron bridges, roofs and railings, shipping, &c., and it is universally admitted that it covers a greater surface than any other pigment, and stands far better on wood, iron, Aberdare lime, and Roman cement, than the ordinary paints of the trade. 21l. per ton; ready-ground purple brown, 24l. per ton. Company's Offices, 1, New Broad-street, London.

JOHN A. WEST, Secretary.

PATENT WHITE ZINC PAINT.—JOHN WARNER and SONS are prepared to supply this paint to builders, painters, and plumbers, on wholesale terms. It is free from all poisonous qualities; it is unaffected by sea-water, sulphuretted hydrogen, or any of the gases, and preserves its original colour where white lead paint will not.—Prospectuses to be had at J. Warner and Sons', 8, Crescent, Jewin-st., London.

PATENT WHITE ZINC, ANTIMONIAL, and other metallic PAINTS, greatly improved in the manufacture, may now be had in any quantity; also whitening and painters' materials of every description.

Wholesale buyers and the trade supplied on liberal terms.

VAUGHAN and SIMONDS, Southwark Steam Colour Works, Stamford-street, Borough, London.

PURE PATENT WHITE ZINC PAINT of the VIEILLE MONTAGNE ZINC MINING COMPANY.—This Company having become Proprietors of all rights and patents of the late Belgian White Zinc Companies in France and Belgium, is prepared to FURNISH, on a large scale, the WHITE OXIDE of ZINC in a PURE STATE, and of a quality which can only be manufactured from the Z ne from their Mines in Belgium. The Patent White Zinc Paint is superior in every respect to other lead paint. It is entirely free from all poisonous radicalness and is unaffected by sea-water, sulphuretted hydrogen, or any gases; besides, it preserves its original colour, which white lead paint does not. White zinc paint retains none of those severe chemically caused effects which lead does to the human frame; therefore Painters' Caulic, nor Varnishes, &c. &c., to which dangerous compounds the workmen who manufacture and use it are subject, and to which persons who inhabit newly painted apartments are also liable. A process article having been introduced in the market under the name of White Zinc Paint, the Public is cautioned against it, because, when adulterated, it becomes a very inferior paint, instead of a first rate one. For further particulars and Pamphlet on the Paint, apply to H. F. MICHOLL, general agent for England and Scotland, at the Company's offices, 12, Manchester-buildings, Westminster-bridge, London.

TO BUILDERS, PAINTERS, AND OTHERS.

TO CABINET MAKERS &c.

COPPOCK'S MAHOGANY STAIN, a Chemical Liquid for imparting a mahogany and rosewood colour to common woods, a specimen of which is at the Exhibition, Section I., Class B, No. 1, and at the office of "The Builder"—Head Office, 3, Bridge-street, Blackfriars, JOHN COPPOCK, Chemist, Bethnal-st., 2s. per lb., or in bottles at 1s. each, and upwards, with directions.—A liberal allowance to agents.

TO ARCHITECTS, BUILDERS, &c.

STEPHENS'S LIQUID OAK, MAHOGANY, and SATIN WOOD STAINS, for staining various sorts of interior woods, so as to give them the appearance and character of the more costly and ornamental kinds, in the BUILDING and DECORATING CHURCHES and CHAPELS, where it is desirable to give the cheaper kind of woods the appearance of antique oak, or to make deal assume the character of mahogany, rosewood, &c., which is now usually done by the use of a cheaper material, these stains will be found more effective than any means hitherto employed. For the repaired timbers of the inside of the roofs of churches, by bringing them to a uniform tint, which operation is very rapidly, and, of course, economically effected, the appearance of an entire roof will be produced. For colouring the backs of the seats, pews, the fronts of galleries, the pulpit, &c., it is equally advantageous.—Prepared by HENRY STEPHENS, and may be obtained at 34, Moorfield-street; at the Office of "The Builder," 1, York-street, Covent garden; at both which places may be had the proper Varnish and Size, with directions for use.
